

# YATHARTH DUBEY

Agra, India • +91 8218869141 • yatharthdubey12dec2004@gmail.com • [LinkedIn](#) • [GitHub](#) • [Portfolio](#)

## SUMMARY

Engineering student with hands-on experience building real-world full-stack applications. Strong foundation in data structures, databases, and modern development tools. Active GitHub contributor with multiple public projects and a strong interest in open-source development. Interested in global engineering environments, particularly Japan's tech ecosystem.

## TECHNICAL SKILLS

**Languages:** JavaScript (ES6+), Python, Java, C/C++

**Frontend:** React.js, HTML5, CSS3, TypeScript

**Backend:** Node.js, Express.js, RESTful APIs, JWT, bcrypt, Google OAuth, WebRTC

**Databases:** MySQL, MongoDB

**Tools & Platforms:** Git, GitHub (active open-source usage), Postman, VS Code, Linux, EmailJs, Vercel, Windows, Linux, Docker

## EXPERIENCE

### Pulse by OptiMaxin

2026

- Assisted in full-stack feature development within a professional product environment.
- Contributed to assigned tasks from development to deployment.
- Collaborated with team members and communicated progress effectively.
- Recognized for reliability, quick learning, and code quality.

## PROJECTS

### TypeAce — Exam-Grade Typing Practice Platform

2026

*React · Node.js · Express · MySQL · JWT · bcrypt*

[Live](#) ↗

- Built a typing practice platform with multiple modes focused on both speed and exam-oriented accuracy.
- Implemented secure user authentication using JWT and bcrypt for session management.
- Designed structured test modules to simulate real exam environments and track user performance.

### UniCircle — Student Networking Platform

2026

*React · Node.js · Express · MongoDB · JWT · bcrypt (In Development)*

[Live](#) ↗

- Building a platform to connect students and alumni for networking, collaboration, and knowledge sharing.
- Designing scalable backend architecture with secure authentication and user interaction features.

### RBS Kids Paradise — Student Management System

2025

*React · Node.js · Express · MySQL · JWT · bcrypt · Multer*

[Live](#) ↗

- Developed and deployed a full-stack system currently used by a school to manage student data, fees, and results.
- Implemented authentication and role-based secure access for administrative operations.
- Integrated file handling (Multer) for document and record management.

### ElectRevise — Voter Record Management System

2025

*React · Node.js · Express · MySQL · JWT · RBAC (Collaborative)*

- Built the admin panel for managing large-scale voter records with secure access controls.
- Implemented role-based authentication (JWT + RBAC) for controlled administrative operations.
- Collaborated with a teammate to integrate admin and user modules into a unified system.

### BlogPick — Blogging Platform

2026

*React · Node.js · Express · MongoDB · JWT · bcrypt (In Development)*

[GitHub](#) ↗

- Developing a full-stack blogging platform with authentication and content management features.
- Implementing CRUD operations for posts along with secure user session handling.

## EDUCATION

### B. Tech in Computer Science Engineering

2023 – 2027

*Raja Balwant Singh Engineering Technical Campus, Agra*

*SGPA: 8.74 / 10 (Till Sem 5)*

**Relevant Coursework:** Data Structures & Algorithms, Operating Systems, DBMS, Computer Networks, OOPs, Software Engineering

## ACHIEVEMENTS

- Secured Rank 6449 — TCS CodeVita Season 12 (Round 1), a global competitive programming contest.
- State-Level Bronze Medallist; National-Level Participant — International Robotics Competition (Avishkaar, Middle Level).
- 1st Place — “Resume Making King” competition, Aarohan (College Level).
- IBM Hackathon 2025 — Delivered an AI-assisted solution under time constraints in a competitive enterprise setting.
- HENNGE backend challenge — Successfully completed the HENNGE backend challenge involving recursion-based problem solving, secure GitHub gist submission, and API-based validation with authentication.
- Maintain multiple public repositories on GitHub with consistent commits and project-based learning.
- Actively explore open-source practices and collaborative development workflows.
